

## Editorial Message

Dear Readers,

Greetings!

It is with much joy and anticipation, we are bringing Vol.02, Issue 02 of Shodh Sari-An International Multidisciplinary Journal. On behalf of Editorial Team Shodh Sari, I would like to extend a very warm welcome to the readers, researchers and reviewers of Shodh Sari. I take this opportunity to thank our authors, editors and anonymous reviewers, all of whom have volunteered to contribute to the success of the journal.

Shodh Sari- An International Multidisciplinary Journal is an international scholarly journal, peer-reviewed/ refereed journal for faculty and research scholars. The journal serves as a forum for the exchange of the ideas and information related to the development of education, health, and other domains for the welfare of community.

The main purpose of the Shodh Sari is to publish original research pertaining to education across all ages and educational levels in multiple disciplines. The secondary purpose of the Journal is the occasional publication of exceptionally important meta-analysis articles that are pertinent to education or other disciplines. The Journal does not typically publish reliability and validity studies of specific tests or assessment instruments, etc.

Shodh Sari is dedicated to the rapid dissemination of high-quality research papers in different disciplines. We welcome contributions that can demonstrate near-term practical usefulness, particularly contributions that take a multidisciplinary / convergent approach because many real-world problems are complex in nature. Our vision is to create a high-quality publication that will be relevant, challenging, thought-provoking, and inclusive of a diverse range of voices and perspectives.

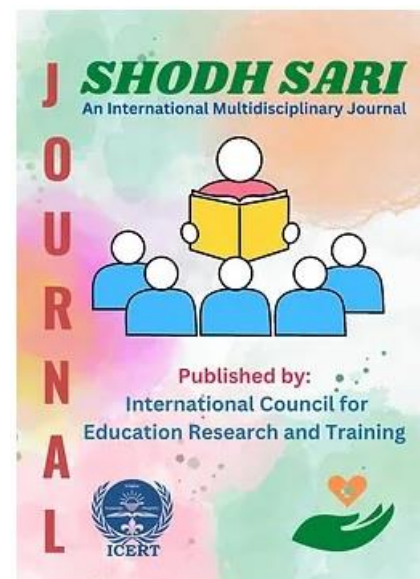

Conducting research is a time- and effort-intensive process and requires meticulous planning to ensure that important aspects are not missed inadvertently, and that adequate time is spent on each step to avoid unnecessary delays. Efficient time management is one of the key skills the researchers must be equipped with, as researcher is expected to undertake several tasks such as carrying out experiments, writing reports, publishing papers, administrative tasks, teaching. To be a successful researcher, it is important to remain focused on your research work. Effective time management can make the researcher more productive as a researcher and minimize the factors that drain your time such as procrastination and interruptions.

With this publication of research work is also equally important, publication in peer reviewed journal (refereed) share the researchers' work with peer specialist and provide quality feedback to researcher. Non only this, publishing a research paper can have many advantages for researchers, including: career advancement, professional recognition, opportunities for collaboration, increased visibility, impact on society, credibility and trust, professional development, inspiration for future research, and contribution to the field. It can help researchers to establish themselves as experts in their field, open doors to new opportunities, and contribute to the advancement of knowledge and understanding in a specific field.

There are many areas that require professionals to engage in academic research. The impact of academic research spreads to all levels of human civilization.

The changes brought about by academic research are both practical and cultural. From the soles of one's shoes to their dentist's work to prevent gingivitis, academic research has continued to silently improve the quality of human life. People usually change their minds when faced with reliable, factual evidence.

Shodh Sari offers a large collection of scholarly articles that can be used to understand advances in knowledge in a field of research and to develop ideas for future research. Shodh Sari is a scholarly publication containing articles written by

researchers, professors and other experts. It allows communication between researchers, form the basis for the development of additional ideas, and follow emerging ideas in different disciplines.

We are extremely pleased that this issue of the journal contains 19 articles on science, psychology, environment, education, inclusive education, computer education, information technology, banking, and social sciences. I look forward to a very successful and stimulating journal, and I welcome any suggestions for improving the quality and the usefulness of the journal.

**Dr. Sandeep Kumar**

Editor-in-Chief, and General Secretary, ICERT
